

# NEWSLETTER

We have installed a V6R lift at a University in Cape Town. A V6R lift is economical and is a space saving platform stair lift providing a popular and versatile access solution for wheelchair users. The wheelchair user rolls onto the platform, safety bars lower, and a constant pressure joystick, operated by the wheelchair user, controls movement along the staircase. A perfect addition to a University.

## MEET THE STAFF

Please welcome our newest team member, Simphiwe Ndlovu. She has her Bachelors of Administration degree and is currently pursuing a BA Admin Honors in Public Administration. We are very excited to have her with us.

### Did you know?

Elevators are considered the safest mode of transportation, and modern elevators are energy-efficient, quiet, and utilize advanced technology.
